

Instructions for Completing the Illinois State Health Form

This is a detailed form and must be completed in its entirety to comply with **state regulations**.

Page one of the form (where it has the "DHS" logo in the left-hand corner) is to be filled in by your physician. Please be sure to pay special attention to accurate recording of all immunizations, including the signature of the physician. Please note that all students are required to have one dose of Tdap vaccine regardless of the interval since the last DTaP, DT or Td dose.

On page two of the form, please be sure that the parent fills in and signs the health history section on the top, and that the physician fills in and signs the physical exam section on the bottom. Please make sure that the physician fills in the diabetes screening in its entirety and the system review.
